## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Stanjek et al. (US 6,440,328 or CAPLUS 2000: 772323).

The references disclose polymerizable liquid crystalline compounds represented by the formula (1) or RN 302897-21-8. Also see Examples 2-3 and 5-6. The reference compounds anticipate the claimed compound.

3. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by CAPLUS 1973: 536255.

The reference discloses a compound represented by RN 41507-64-6. The reference compound anticipates the claimed compound including compound (a) in Claim 7.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 1756

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stanjek et al. (US 6,440,328 or CAPLUS 2000: 772323).

The references differ from the present claims in that the present claimed composition contains at least two polymerizable compounds in which at least one polymerizable compound is the compound of formula (1). Because the reference compounds is a polymerizable liquid crystalline compound, it would have been obvious to those skilled in the art to utilize the reference compound or the homologous compounds as components for liquid crystalline composition.

***Allowable Subject Matter***

6. Claims 13-25 are allowed.
7. Claim 6, 8 and 10-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Response to Arguments***

8. Applicant's arguments filed 7/5/06 with respect to the rejections in the previous Office action have been fully considered and are persuasive. Therefore, the rejection has been

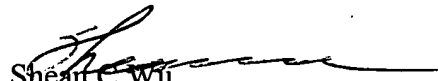

Art Unit: 1756

withdrawn. However, upon further consideration, new grounds of rejection are made in the sections 2-3 and 5 cited above.
